

EAST BAY INTERNET ONLY \$35/MONTH NO CONTRACT

- **100Mbps+ upload and download.** It's the best deal in town.
- **We are (and always have been) \$35/month.** Crazy right?
- **No additional monthly fees.** No fine print. No asterisks.
- **We're actually local!** Locally owned and operated in SF and Oakland
- **We give back to the community** by providing awesome internet to underserved communities in the Bay Area.

*****WARNING***** Side effects may include elevated street cred and legit bragging rights.

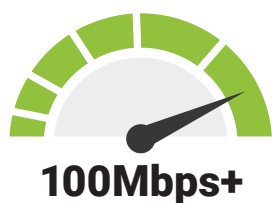

Local internet. Delivered wirelessly.

Monkeybrains is a wireless ISP, meaning we primarily deliver internet via rooftop radio. We have antennas on thousands of rooftops and serve fast, reliable internet to over 20,000 happy customers across the Bay Area. Because we own all of our means of data distribution we're able to avoid depending on other telecom companies' wires and infrastructure, allowing us to charge the lowest prices around!

With humble beginnings in the Bayview district in 1998, Monkeybrains remains the only locally owned and operated ISP in the Bay Area. We're committed to providing fast and affordable internet to Bay Area communities and residents. We're also proud to offer the most progressive privacy policy of any competitor. We do not monitor user traffic and are dedicated to providing and defending a private, unbiased internet experience for all of our subscribers.

Experience the Monkeybrains difference

Blazing speeds

Have 5+ devices streaming HD simultaneously without issue

Glitch-free video chatting with your friends/family/coworkers
